Bilingual Communication
(English/Spanish)

Team Collaboration

Problem-solving & Analysis

SUMMARY

Software Developer specialized in scalable SaaS platforms and AI-driven products using Next.js and Node.js. I focus on real results by turning complex data requirements into clear, intuitive user experiences.

WORK EXPERIENCE:

Taurus services, Data Analyst (2023 - 2025)

- Developed TypeScript APIs integrating legacy database systems with modern React frontend, reducing data entry time by 40%.
- Worked across technical and operational workflows, including documentation validation, compliance checks, and internal tooling.

PROJECTS

GymShock, Mobile Developer & Team Lead

2025 - Present

- Developed an AI-driven mobile app following high-fidelity Figma design.
- Built high-FPS camera pipelines using React Native + Android Studio for computer-vision features.
- Set up secure authentication and persistent session state using Zustand.
- Collaborated with data and backend teams using OpenCV, MediaPipe, Kafka, and Databricks.

AMMAE, Full-Stack Developer

2025

- Built a modern eCommerce platform using Next.js 15, TypeScript, TailwindCSS, Drizzle ORM, and Neon PostgreSQL.
- Designed a monolithic Server Actions architecture with organized routes and handlers for cleaner code and maintainability.

EDUCATION & CERTIFICATIONS

- **B.S. in Informatics Engineering** (Expected 2026)
- **Meta Front-End Developer Professional Certificate**, Remote
- **Meta Programming with JavaScript**, Remote
- **Meta HTML and CSS certification**
- **Colombo Americano Ingles C1**, Medellín, Antioquia
